## CHAMPIONS OF ORGANIC DAIRY

We, the farmers of the Organic Valley cooperative, provide the delicious, nutritious, fresh dairy products in demand across the country. We focus on regional production to build local economies, allowing rural communities to protect their local environments. We believe in pasturing our cows. We don't use synthetic hormones or genetically modified organisms. We never use synthetic pesticides or fertilizers on our land. As a result, our cows produce the highest quality milk. Together, we are creating a bright and healthy future.
